

More security with a supplementary insurance from HollandZorg!

The HollandZorg Public Healthcare Insurance covers the most essential care, such as emergency care, hospital care and your GP. In addition, we offer two supplementary insurances which give you more service and greater security: the Special Temporary Employment Policy and the No Risk Temporary Employment Policy. Your employer can tell you which supplementary insurance has been taken out on your behalf. Below you can see which reimbursements our supplementary insurances provide.

Emergency dental treatment

You may have the misfortune of suffering acute pain to your teeth. Both the Special Temporary Employment Policy and the No Risk Temporary Employment Policy offer a contribution towards the costs of emergency dental treatment in the Netherlands (urgent dental consultations, emergency fillings, anaesthetic, tooth-pulling, x-ray photos). The care in question must be urgent in nature, i.e. care aimed at resolving your acute pain symptoms and ensuring you are able to chew properly. General work on your teeth does not fall under this reimbursement. At www.hollandzorg.com/voorwaarden, you can find a list of all the treatments which qualify for reimbursement.

Special Temporary Employment Policy	maximum € 200 per calendar year
No Risk Temporary Employment Policy	maximum € 200 per calendar year

Medically necessary repatriation

Medically necessary repatriation is reimbursed under both the Special Temporary Employment Policy and the No Risk Temporary Employment Policy. This includes transport to your home country, the necessary medical support and organising the transport. To qualify, the place where you are staying and your home country must both be located within the European Union (mainland). The remuneration only applies to transport for yourself. Transport for family members and other fellow travellers is not eligible for reimbursement.

Special Temporary Employment Policy	100%
No Risk Temporary Employment Policy	100%

Transport of mortal remains

If you should die, the Special Temporary Employment Policy and the No Risk Temporary Employment Policy will reimburse the costs of the transport of your mortal remains from the place of your death to your home country, including the cost of organising the transport. The following fall under transport: the costs of the transport itself and the additional costs directly required for transport, such as compulsory embalming and a travel coffin. The costs of laying the corpse on a bier and funeral services do not fall under transport. Both the place of your death and your home country must be located within the European Union (mainland).

Special Temporary Employment Policy	100%
No Risk Temporary Employment Policy	100%

Reimbursement of excess

As stated in the Public Healthcare Insurance leaflet, a compulsory excess applies in the Netherlands for reimbursements under the public healthcare insurance. In addition, you have a voluntary excess of € 500. Under the No Risk Temporary Employment Policy, you do not have to pay the excess. This is because the No Risk Temporary Employment Policy offers a reimbursement for the costs of both the compulsory and the voluntary excess.

Special Temporary Employment Policy	-
No Risk Temporary Employment Policy	100%

This leaflet covers the main points of these insurance policies. You can download our comprehensive conditions at www.hollandzorg.com. No rights may be derived from this leaflet.
